Academic Programs

Closing the data skills gap with free software and learning resources for students and instructors.

“Data skills have risen in importance over the past five years and the trend isn’t likely to stop anytime soon. Surveyed **recruiters** rank data literacy as the skill highest in demand for entry-level candidates today”

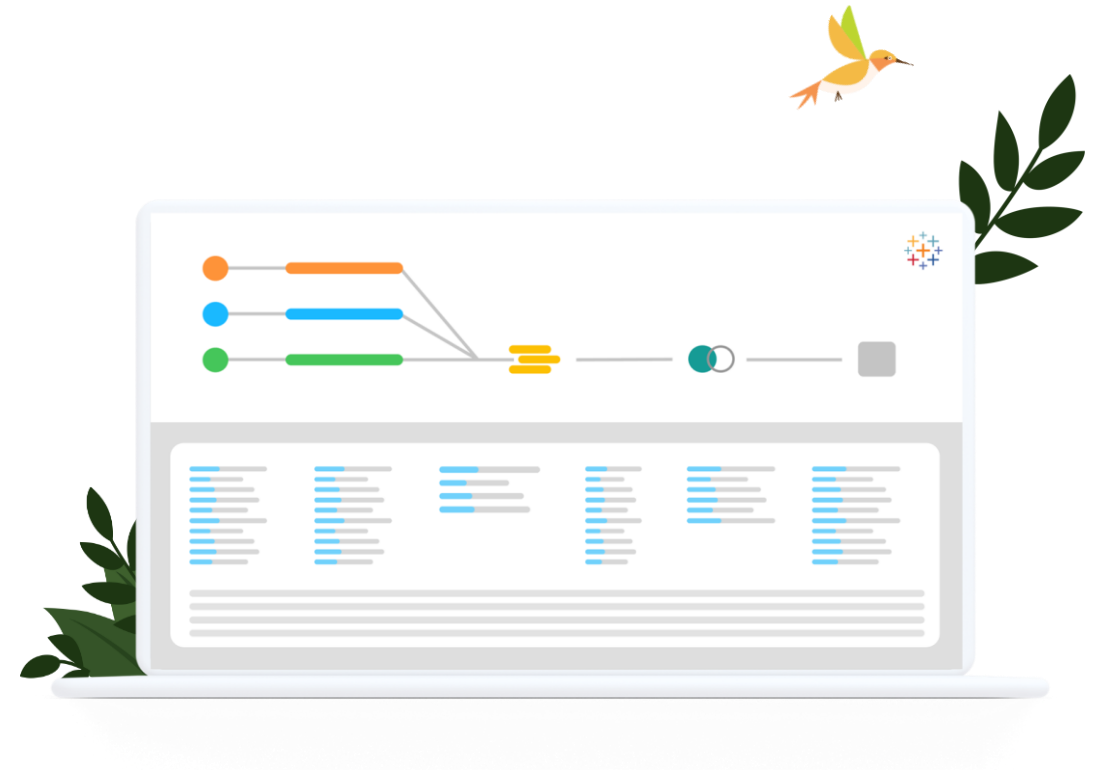

Tableau commissioned research study by Forrester Consulting

Vizzin' it up with the Data Dawgs Crossroads Classic Analytics Challenge winners. 🏆

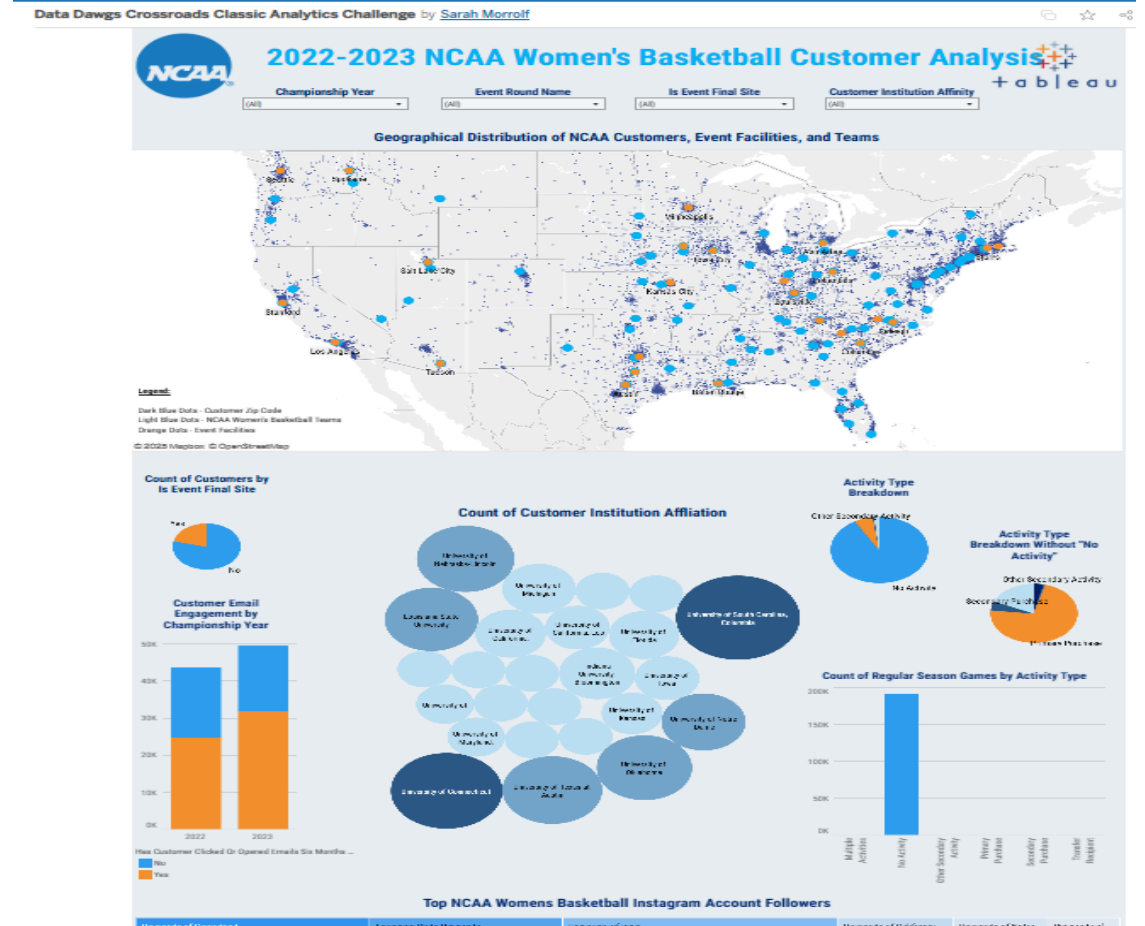

An all-women team of undergrads at Butler University including [Sarah Morrolf](#), [Rachel Medina](#), Karin Johnson, [Zoë Franz](#), and [Juanita Rojas](#) placed first at the CrossRoads Classic Analytic Challenge by analyzing Division I Women's Basketball data to predict ticket sales and give recommendations to grow the sport of women's collegiate basketball. The analytics challenge was organized in collaboration with Indiana universities and the NCAA.

👏 Shout out to the 🏆 Tableau Academic team [Jessica Lyons](#), [KJ Kim](#), and volunteers who served as judges and conducted workshops for 276 students from 7 universities—empowering the next generation of data leaders!

Tableau Workshops

FRIDAY FEBRUARY 7, 2025

12:00-1:00-PM ET

- TABLEAU PREP DEMO
- ANSWERING QUESTIONS USING THE PRACTICE DATA SET

Kyle Yetter is a **Senior Manager of Data & Reporting Analytics** at **Ancestry** who aims to make decision making easier for the executives he works with by having the relevant data ready for them when they need it in a way that allows for actionable insight. He also works to help others in the organization improve their Tableau skills, including hosting a live **Workout Wednesday** session each week to share how he goes about solving the challenge and answer questions about how certain outcomes are achieved. Kyle loves being involved in the **Tableau community** and is a co-lead for the Workout Wednesday community initiative.

VIRTUAL

- TABLEAU DESKTOP
- VISUALIZATION BEST PRACTICES

Rain Ortega the Program Lead for **Tableau User Groups (TUGs)**, where they help leaders of over 180 global groups facilitate meetings that bring Tableau skills and connection to their attendees. As a former instructor for Tableau, they love teaching Tableau fundamentals and visual best practices for data storytelling. Their academic background is in biocultural anthropology with a focus on alcohol use disorders and purportedly protective genetics. They use their anthropology background to ground everything they do in a humanistic and equity-focused approach.

VIRTUAL

- STORY-TELLING
- DESIGN THINKING

Prasann Prem is a Tableau Visionary and a Social Ambassador and loves to share his learnings and insights through his 17k+ strong community on LinkedIn. He is a **Senior BI Engineer at Emirates NBD** and leads the design and development of financial dashboards.

He has an immense love for mentoring and his initiatives “Tableau Buddy” and Tableau Buddy Sandbox” have been an integral part of his journey to succeed in his vision to help people with Tableau skills. He also co-leads **Analytics TUG** and **Tableau Buddy TUG** and loves to scout and find progressing talents to bring them to these platforms.”

Fostering Data Brilliance

Leave

Welcome to our vibrant Teaching and Learning Community, where academia and industry leaders come together to nurture the next generation of data-savvy trailblazers.

This group is hosted by our Tableau Community Academic team, regularly featuring speakers from academia and diverse industries. We share tools and best practices to foster data brilliance. Together, we break barriers, connect academia and industry leaders, and create exciting learning opportunities that equip future leaders with essential data skills.

Whether you're an experienced academic or an industry professional, this group is your hub for innovation and inspiration.

We are not just educators; we are curious architects, collaboratively shaping the learning landscape. Join us on this journey to empower leaders who thrive in tomorrow's data-driven world!
